Graph-02 Solutions

Solution 1:

Time Complexity : o(v+e)
Space Complexity: o(v+e)

```
import java.util.*;

class Solution{

static void addEdge(int u, int v,
 ArrayList<ArrayList<Integer>> adj){
   adj.get(u).add(v);
}

static void DFSUtil(ArrayList<ArrayList<Integer>> g,
                    int v, boolean[] visited){
   visited[v] = true;

   for(int x : g.get(v)){
      if (!visited[x]){
         DFSUtil(g, x, visited);
      }
   }
}

static int motherVertex(ArrayList<ArrayList<Integer>>g,
                        int V){

   boolean[] visited = new boolean[V];
   int v = -1;

   for(int i = 0; i < V; i++){
      if (!visited[i]){
         DFSUtil(g, i, visited);
         v = i;
      }
   }

   boolean[] check = new boolean[V];
   DFSUtil(g, v, check);
```

```
    for(boolean val : check){
        if (!val){
            return -1;
        }
    }
    return v;
}

 public static void main(String[] args){
    int V = 7;
    int E = 8;

    ArrayList<
    ArrayList<Integer>> adj = new ArrayList<
                              ArrayList<Integer>>();
    for(int i = 0; i < V; i++){
        adj.add(new ArrayList<Integer>());
    }
    addEdge(0, 1,adj);
    addEdge(0, 2,adj);
    addEdge(1, 3,adj);
    addEdge(4, 1,adj);
    addEdge(6, 4,adj);
    addEdge(5, 6,adj);
    addEdge(5, 2,adj);
    addEdge(6, 0,adj);

    System.out.println("The mother vertex is " +
                       motherVertex(adj, V));
}
}
```

Solution 2:

Time Complexity : o(v+e)
Space Complexity: o(1)

```
import java.io.*;
import java.lang.*;
import java.util.*;

class Solution {
        int V, E;
```

```
Edge edge[];

class Edge {
        int src, dest;
};

Solution(int v, int e){
        V = v;
        E = e;
        edge = new Edge[E];
        for (int i = 0; i < e; ++i)
                edge[i] = new Edge();
}

int find(int parent[], int i){
        if (parent[i] == i)
                return i;
        return find(parent, parent[i]);
}

void Union(int parent[], int x, int y){
        parent[x] = y;
}
